

GitOps

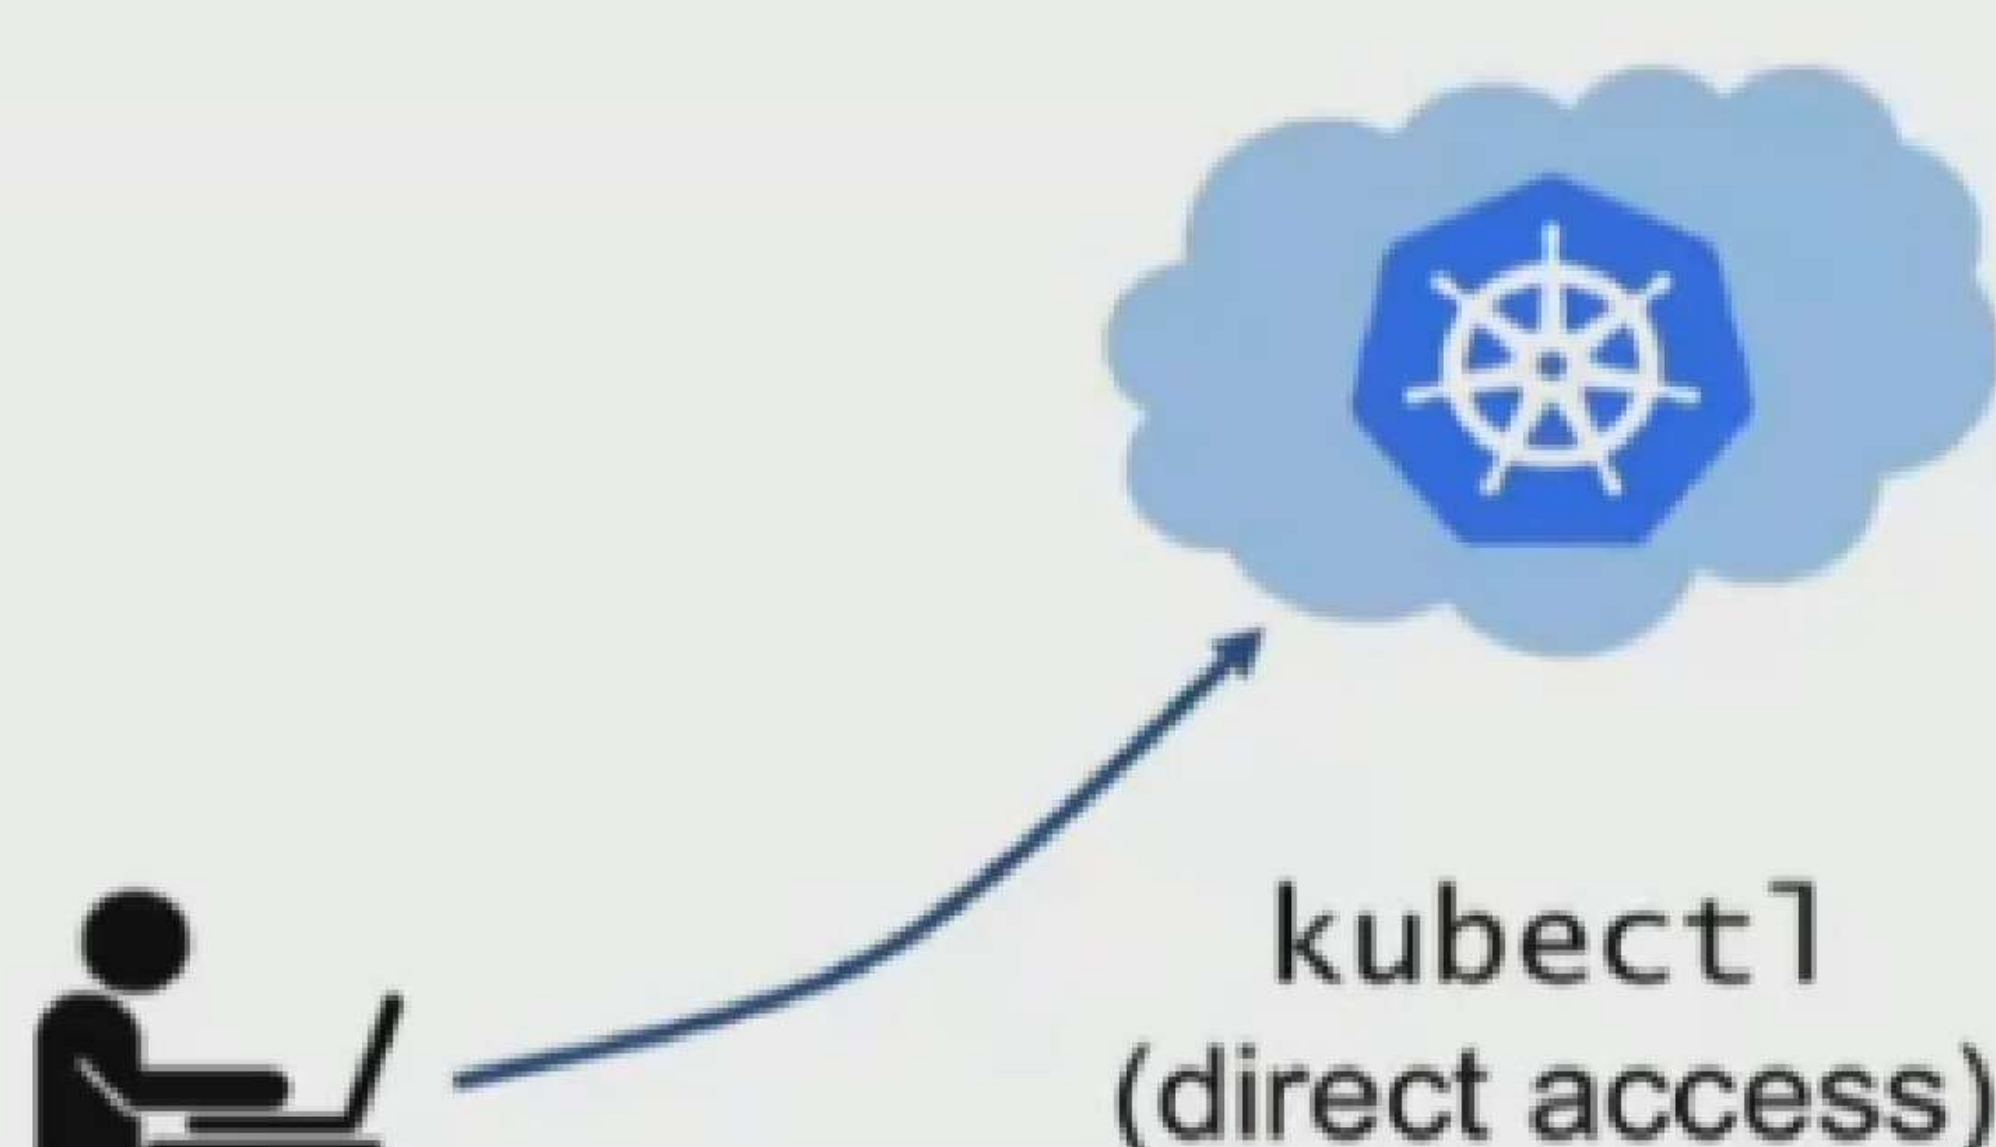

-OPERATION FRAMEWORK
ON DEVOPS PRACTICE

What is GitOps?

GitOps is a set of best practices where the entire code delivery process is controlled via **Git**, including infrastructure and application definition as code and automation to complete updates and rollbacks.

Traditional Operation Model

GitOps Operation Model

GitOps Operation Model

What is ArgoCD?

ArgoCD is a declarative, GitOps continuous delivery tool for Kubernetes.

ArgoCD follows the **GitOps** pattern of using **Git** repositories as the **source of truth** for defining the desired application state.
